

## 2 FIRST Season Overview

### Explore the Future

The ocean is more than what you can see on the horizon. Beneath the surface lies our planet’s most complex ecosystems, full of life and potential for exploration and learning, where each inhabitant has a role to play in building a thriving environment.

During the 2024-2025 FIRST season, FIRST® DIVE<sup>SM</sup> presented by Qualcomm, teams will use their STEM and collaboration skills to explore life beneath the surface of the ocean. Along the way, we’ll uncover the potential in each of us to strengthen our community and innovate for a better world with healthy oceans. Join us as we explore the future.
